The sum, TOTAL, represents an estimate and not an exact count of the number of distinct categories. Ethnicity and race are treated as separate concepts in the federal statistical system. Based on self-identification, respondents select one ethnicity from a list of ethnicity categories and one or more race from a list of race categories. The self-identification groups are consistent with those mandated by the Office of Management and Budget.

<sup>†</sup> To simplify presentation of the data, MBDA removed industry sectors that had 2% or less of minority employer firms. As a result, the percentages will not add to 100%.

<sup>‡</sup> Minority-owned firms as a percentage of total firms in each state. Equally minority/non-minority owned firms are not included in this visualization, resulting in a slight undercount of the percentages displayed.

Like the 2020 Census, the ABS used the improved race and ethnicity question design and coding procedures. These improvements enabled a more accurate depiction of how people self-identify, yielding a more accurate portrait of how people report their Hispanic origin and race within the context of the race and ethnicity questions asked on the survey.
